

BOTTOM OF BED

Basic Components

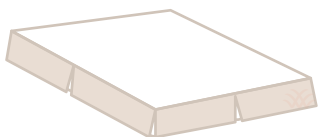

GLOSSARY

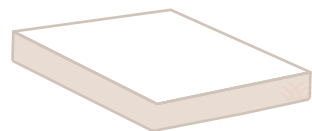

DECK: Made out of a 70/30 poly/cotton white fabric, which spans the full width and length of the platform, it holds the bottom of the bed treatment in place. Decorative fabric is seamed to the platform to create the drop.

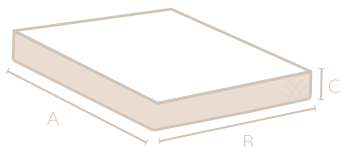

DECK STRIP: An additional 3"-4" of drop fabric added to 3 sides of the deck (sewn atop), minimizing the appearance when the box spring shifts or moves.

BEDSKIRT: A bottom of bed cover that begins at the top of the Box Spring and finishes $\frac{1}{2}$ " off the finished floor. This covers the box spring and the space above the floor.

BOX SPRING COVER: A bottom of bed cover that begins at the top of the Box Spring and covers only the Box Spring, plus 1" past it. Anything below the box spring will remain uncovered.

DIMENSIONS: Three measurements are needed for bottom of bed treatments; length, width & drop. Length (A) from head to foot and width (B) from one side to the other. The drop (C) is from the top of the boxspring to the end of decorative fabric.
