

DRAPERY Styles

THINGS TO KNOW

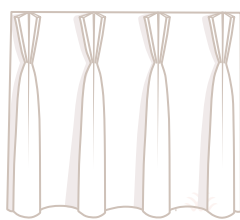

SINGLE PLEAT
or Knife Pleat

STYLE: Contemporary style with defined single pleat

USE: Where minimal fullness is desired

AVOID: Fullness exceeding 200%

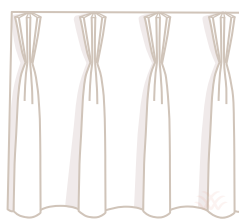

DOUBLE PLEAT
or 2-Finger Pleat

STYLE: Conventional pleat style with only two folds, tacked at bottom

USE: Where performance is a priority

AVOID: No operational deficiencies

TRIPLE PLEAT
or French / 3-Finger Pleat

STYLE: Traditional pleat style with three folds, tacked at bottom

USE: Operates with excellence in any and all applications

AVOID: No operational deficiencies

EURO

STYLE: Traditional pleat style with three folds, tacked at top

USE: Where details are noticed and valued, where top of drapery is visible

AVOID: Extremely heavy or extremely light fabrics, overemphasizes fullness in upper third of treatment

INVERTED
or Pleat to Back

STYLE: Discrete and simplistic, operates functionally with aesthetic improvements

USE: Where top of drapery will be visible

AVOID: Narrow wall space, or wider than typical as stacking requirements are larger

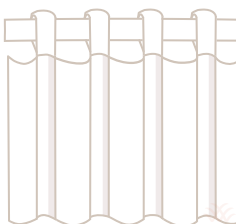

RIPPLEFOLD
or Snap Drapery

STYLE: Contemporary and refined

USE: Where budgets allow for additional appeal and interest

AVOID: Applications concealing hardware (must hang below track), existing hardware applications

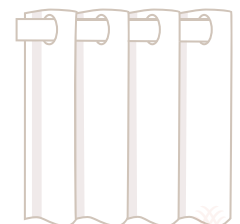

TAB TOP

STYLE: Flexible and casual, hassle-free and versatile

USE: When accentuating decorative hardware

AVOID: Traversing applications and light-sensitive areas as drapery will not move or block light

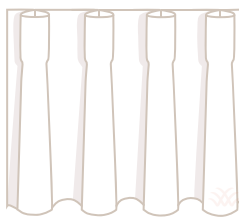

GROMMET

STYLE: Creatively integrates drapery and hardware into a single treatment

USE: Stationary or narrow panels only

AVOID: Traversing treatments, does not travel well across bracket

CARTRIDGE
or Barrel Pleat

STYLE: Dignified and rigid, ensures sharpness and distinction

USE: Terrific upgrade for reuse of existing hardware

AVOID: Narrow applications, requires additional depth for proper stacking, cost must be a consideration
